# LETTER OF RECOMMENDATION

With enormous pleasure, I am writing this letter of recommendation as a Senior Manager, Project Delivery for Ms. Panthangi Nikitha who has been working with ACS Solutions as an Associate software engineer - DevOps for almost 2 years.

Nikitha joined as fresher and had zeal to learn new things and seek logical solution to any complex problem coming her way. After a very minimal training she was able to work with bare supervision on her assigned tasks and would also proactively take up new initiatives. In the initial stages of her career she made an impactful deployment improvement resulting in reduction of the downtime of site during release from 5-10 minutes to 90 seconds or even less depending on the LoadBalancer health check. This establishes that she quickly adapts to new things and works hard to accomplish the set goals.

She is a very keen observer and picks up the right things out of her investigation. For instance, she studied the budget and billing of our project and came up with a plan which resulted in a saving of around 7%. Nikitha's suggestions were always appreciated and her creativity was never restricted to content.

It is my pleasure to recommend Ms Panthangi Nikitha to your prominent university. She will be a great inclusion. With her skills and determination, she has proved herself to be a part of your university.

Name: Raju Vinoth

Organization: ACS Solutions

Designation: Senior Manager
